Project Summary:

The City of Independence is the largest City, geographically, in Kentucky and is experiencing unprecedented growth and development due to improved road systems and its location. The goal of this study is to provide more detailed guidance for future land use in the study area surrounding the Madison Pike corridor. The small area plan will build upon, augment, and refine the policies and vision of the City that will be folded into Kenton County's comprehensive plan.

Independence Small Area Study

As a part of this community planning effort, the design team seeks your comments regarding your ideas and opinions of issues and opportunities within the Independence Small Area. We have divided the questions into three areas:

1. **Amenities:** The features of a neighborhood which make it a desirable place to live such as nearby parks, playgrounds, retail, grocery, restaurants, community centers, health care, banks etc.
2. **Neighborhood Integrity and Appearance:** These are the surroundings, the circumstances, objects, and conditions such as general community character, street and sidewalk design, street lighting, wayfinding, green spaces, landscaping etc.
3. **Growth Management/Development:** Examples are restrictions, recommendations and/or design guidelines that affect the character of community. These can include the location, extent and type of land use suitable for an area.

Your input regarding the following questions will be invaluable to the design team for drafting principles and making recommendations for the downtown development.
