

# Green Infrastructure

- Watershed – a defined area that water flows across or through on its way to a common body of water. It is the preferred area to use in studying the natural environment.
- The study area lies in two watersheds based on recent testing both streams are in poor condition.
- **Dry Creek**
  - 12.4 square miles
  - 72 percent is developed
  - 24 percent covered with impervious material
- **Study Area**
  - 0.04 square miles (24.7 acres)
  - 57 percent covered with impervious material
- **Pleasant Run**
  - 6.5 square miles
  - 69 percent is developed
  - 18 percent is covered with impervious material
- **Study Area**
  - 0.07 square miles (46 acres)
  - 53 percent is covered with impervious material
